

WhitePaper FTM

1. Introduction

In an era of rapid technological advancement, where traditional investment approaches intersect with cutting-edge technologies, FTM represents a revolutionary project aimed at integrating the best practices of investing with the latest IT solutions.

2. Overview of the Problem

Traditional Investment Structures: In modern investment firms, traditional roles such as analysts, strategists, and portfolio managers are becoming obsolete and inefficient. These structures often create costs that increase the investment expense for private investors and small businesses.

High Entry Threshold: For many potential investors, including startups, small businesses, and educational institutions, classic investment paths remain inaccessible due to high entry barriers and the complexity of participation.

Human Factor: Traditional manual portfolio management and trading involve risks associated with human errors, emotional decisions, and limited access to real-time data.

Lack of Flexibility and Scalability: Many investment firms face challenges in scaling their services, especially when working with different clients such as private investors, small businesses, or educational institutions.

FTM's Solution: Against this backdrop, FTM offers a unique solution, replacing outdated and inefficient investment structures with advanced algorithmic and AI solutions. We focus on providing investment products for those who previously faced barriers to investing. Our model allows for reducing costs, eliminating the human factor, and providing scalable investment solutions for various client categories.

3. FTM Solution

Comprehensive Investment Automation: FTM doesn't just follow automation trends; we set standards. Our company replaces traditional investment structures such as analysts, strategists, and portfolio managers with algorithms and artificial intelligence. We develop AI-created portfolios and provide automatic rebalancing, as well as algorithmic formation and position management.

Advanced Analytics: Using our unique algorithms, we perform deep analysis of financial markets. This information allows us to not only forecast market trends but also to form strategically advantageous portfolios for investors.

Accessibility for All: FTM aims to make investments accessible to everyone. We focus on private investors, small businesses, startups, and educational institutions that previously faced barriers to investing. Our solutions offer a low threshold for entering the financial market, opening doors for those who previously found investing complex or unattainable.

B2B Solutions: Our offerings are not limited to individual investors. We provide ready-made portfolios, outsourcing, server solutions, technical support, and training for businesses. With the ability to scale and adapt to client needs, we create ideal solutions for investment funds, business structures, and educational institutions.

Technological Advantage: Thanks to modern technologies like blockchain, we ensure maximum transparency and accuracy of all analytical, transactional, and statistical data. Also, our server solutions are powered by solar energy, making us an environmentally responsible company and reducing operational costs.

Elimination of the Human Factor: One of the key aspects of our approach is minimizing the human factor in the investment process. By eliminating potential errors associated with human intervention, we ensure greater stability and predictability for our clients.

FTM reimagines how people invest their funds, offering modern, technologically advanced, and accessible solutions for a wide range of users.

4. Technical Features

Server Infrastructure:

Eco-Friendly and Efficient: We have two server parks with a total power of 20 kW, fully powered by solar energy, reducing our electricity costs and environmental footprint.

High-Performance Equipment: Powerful servers ensure fast and stable operation of all our systems and applications.

Algorithmic Solutions and Artificial Intelligence:

Experience in Development: Over more than 12 years, we have created over 100 different software solutions. This includes everything from basic investment algorithms to complex algorithmic strategies.

Focus on Private Investors and Small Business: Our solutions are designed to provide high-quality investment products for small businesses, startups, and educational institutions that previously lacked access to such products.

API and Integration:

Versatility: We provide an API for integrating our platform with other systems, ensuring flexibility in interactions for partners and developers.

Security: Our APIs are designed with advanced security standards in mind to protect the data and operations of our clients.

Solutions for Administrators and Users:

Multifaceted: We provide various interfaces for administrators and users, taking into account their individual needs.

Ease of Use and Intuitiveness: Our frontend and backend solutions are created to ensure ease of use, understanding, and management of processes.

Blockchain and Tokenization:

Transparency and Reliability: The use of blockchain technology ensures the verification of the authenticity of analytical, transactional, and statistical data.

FTM Token: Our own ERC-20 token, introduced to enhance interaction within the platform and to provide additional opportunities for investors.

All these technical features ensure our platform maintains a high level of reliability, efficiency, and innovation, making it a leading solution in the investment industry at this stage.

5. Tokenomics

Overview: The FTM token represents a digital representation of the company's assets and services. It grants investors and users access to unique algorithmic solutions, portfolios, training, and other resources offered by FTM.

Key Features:

Token Type: **ERC-20**

Total Issue Volume: **2.2 billion**

Initial Sale Price: **\$0.01**

Distribution Method: **IDO, presale, airdrop**

Token Distribution:

Development and Support: 572 million tokens (26%) will be allocated to complete all developments and maintain the project, including expanding server farms, improving algorithms, and creating new products.

Team: 330 million tokens (15%) will be reserved for the team as an incentive for long-term work and project development.

Marketing and Partnership: 220 million tokens (10%) will be used to attract new users and partnerships with educational institutions, startups, and small businesses.

Reserve: 440 million tokens (20%) will be held in reserve for unexpected expenses or new strategic initiatives.

Community and Airdrops: 330 million tokens (15%) will be distributed among the community through airdrops, bounties, and other participation incentive programs.

Token Sale: The remaining 308 million tokens (14%) will be offered for purchase during IDO and presale.

Use of Funds:

Technical Infrastructure (40%): Improvement and expansion of server parks, investment in technological equipment, and optimization of electricity costs.

Development and Research (25%): Development of algorithms, creation of new software solutions, and improvement of existing ones.

Marketing and Expansion (20%): Attracting new users, partnerships, and strengthening market positions.

Operational Expenses (10%): Employee salaries, office rent, logistics, and other current expenses.

Contingency (5%): Unforeseen circumstances or new strategic initiatives.

This tokenomics will allow FTM to ensure sustainability and long-term development, providing high-quality services to its clients.

6. Development Roadmap

Q4 2022: Foundation and Initiative Launch

Completion of initial market research and definition of core business directions.

Launch of solar energy-powered server farms.

Starting the development of core algorithms for financial market analytics.

Q1 2023: Alpha Version and Initial Products

Release of the alpha version of the desktop application for auto-investing.

Development of an API for integration with other financial platforms.
Beginning of services for private investors.

Q2 2023: Expansion of Service Portfolio

Launch of investment products for small businesses and startups.
Deployment of IT infrastructure for private investment funds and businesses.
Providing outsourcing services and training for B2B clients.

Q3 2023: Public Launch and Scaling

Official launch of all the company's main products and services.
Start of active marketing and attracting new clients.
Conducting an IDO and other events related to the FTM token.

Q4 2023: Globalization and New Markets

Expansion into international markets and adaptation of products for different regions.
Collaboration with educational institutions to create investment funds.
Continuous improvement of algorithms and implementation of new technologies.

Q1 2024: Innovation and Growth

Development of new algorithmic solutions for analytics and investing.
Implementation of blockchain technologies for data authenticity verification.
Continuous updates and expansion of the list of offered services.

The roadmap is a dynamic document that may change in accordance with real-world circumstances and market needs. However, the key milestones will allow potential investors and clients to understand FTM's development strategy.

7. Risks and Solutions

Market Risks:

Risk: Cryptocurrency market volatility can lead to significant price fluctuations.

Solution: Our financial experts continuously monitor the market to adapt strategies and minimize the impact of market volatility.

Regulatory Compliance Risks:

Risk: The regulatory environment for cryptocurrency and blockchain is still not fully defined.

Solution: We collaborate with legal firms to stay informed about all regulatory changes and respond quickly to them.

Project Development Risks:

Risk: The project may encounter obstacles such as technical difficulties.

Solution: Our developers regularly undergo additional training and use proven methodologies to ensure product stability and quality.

Technology Adoption Risks:

Risk: Potential users may be slow to adopt new technology.

Solution: We conduct educational seminars and marketing campaigns to increase awareness of our products and technologies.

Risk of Loss of Access Keys:

Risk: Loss of keys leads to the inability to recover tokens.

Solution: We offer integrated security solutions and multifactor storage systems to minimize the risk of key loss.

Risk of Roadmap Changes:

Risk: The project may decide to change its roadmap.

Solution: We strive for maximum transparency and provide regular reports on our progress, and engage the community in discussing key changes.

Blockchain Update Risks:

Risk: Updates in the blockchain can affect the project.

Solution: Our specialists continuously monitor blockchain updates and test them for compatibility with our product to ensure its stability.

We exert all efforts to ensure the safety and stability of our product for all our users and investors.

8. Conclusion

FTM stands at the forefront of innovation in the financial sector. By combining high-quality software with smart algorithms and artificial intelligence, we offer highly efficient investment solutions. Our mission is to democratize the financial industry, making it accessible and straightforward for private investors, small businesses, startups, and educational institutions.

FTM primarily focuses on automating all stages of the investment process. Instead of the classic approach, which requires significant resources and human labor, we apply artificial intelligence technologies for analysis, strategy formation, and portfolio management. This approach reduces costs and makes investing more accessible to everyone.

Our solar-powered server park underscores our commitment to ecological responsibility and sustainable development. This, in turn, allows us to ensure stable and reliable operation of all systems with lower energy costs.

While many companies seek short-term profit, FTM aims for long-term relationships with clients and partners. We understand that our success is directly linked to the success of our clients. Therefore, we offer comprehensive solutions, training, and support, helping our clients grow and develop.

In conclusion, it's essential to emphasize that FTM is not just a technology company. We are a team of passionate professionals, ready to set ambitious goals and achieve them. We believe in our mission and that our approach to investing can change the industry for the better.

Join us on this exciting journey!
